

Alisina Karimi

Turin, Italy | alisinakarimi.2003@gmail.com
[Portfolio](#) | [GitHub](#) | [LinkedIn](#)

Summary

Software Engineer specializing in scalable systems and distributed architectures. B.Sc. in Computer Engineering with a track record of optimizing production systems, reducing infrastructure costs via architectural improvements, and building end-to-end analytics platforms. Experienced in high-autonomy remote environments across multiple time zones.

Experience

WineHub Commerce

Nov 2024 – Present

Full Stack / Backend Engineer

Adelaide, Australia (Remote)

- Optimized database queries and performance, achieving **3×–10× improvements** across critical workloads.
- Worked on migration from MariaDB to **PostgreSQL**, resulting in a **60% infrastructure cost reduction**.
- Designed and implemented **Go-based microservices** for analytics, billing, and webhook processing.
- Built a full BI platform (custom dashboards, reporting pipelines) for financial decision-making.
- Integrated compliance/fulfillment APIs: Sovos ShipCompliant, Avalara, VinoShipper, and WineDirect.
- Automated reporting and compliance pipelines, significantly reducing operational overhead.

Moneyviz srl

May 2024 – Nov 2024

Full Stack Developer

Turin, Italy

- Developed financial analytics features using **Laravel** and **Vue.js**, enabling portfolio performance tracking and visualization for end users.
- Improved backend data ingestion and transformation pipelines, reducing latency of analytical queries and improving responsiveness of dashboards.
- Refactored data processing logic to improve consistency across financial reporting workflows and reduce edge-case discrepancies.
- Collaborated closely with product stakeholders to translate financial requirements into scalable backend and UI implementations.

RUN Polito APS-ETS

Sep 2022 – May 2024

Software Developer

Turin, Italy

- Developed internal tools using **Go** and **JavaScript** to support operational workflows for a multi-team student organization.
- Automated administrative and coordination processes, reducing manual workload and improving turnaround time for internal requests.
- Refactored legacy services to improve maintainability and reliability, reducing recurring issues and simplifying future feature development.
- Worked directly with non-technical stakeholders to identify inefficiencies and design practical software solutions.

WEEEOpen

May 2022 – Aug 2022

Back-end Developer

Turin, Italy

- Improved backend services using **Django**, enhancing performance and stability of core application features.
- Supported frontend integration using **React**, improving data flow between backend APIs and user interfaces.
- Participated in debugging and issue resolution across the stack, reducing friction in development and testing cycles.

Open Source / Freelance Developer

Sep 2021 – Present

Software Developer

Remote

- Designed and implemented distributed data processing prototypes using **Kafka** and **Node.js** for event-driven workflows.
- Contributed to open-source backend projects, focusing on API design, documentation, and developer experience improvements.
- Worked independently on multiple small-scale projects, strengthening ability to scope, design, and deliver features end-to-end.

Projects

Chatster | Go, React, SQLite, Gorilla WebSockets

- Built a real-time chat system with stateful connection management and heartbeat monitoring.
- Optimized message persistence using **SQLite in WAL mode** for low-latency writes.

Skills

Languages: Go, Python, C, PHP, JavaScript/TypeScript, SQL, Java
Frameworks: React, Vue.js, Django, Laravel, FastAPI, Symfony, Gin
Cloud/DevOps: Docker, Kubernetes, AWS, Terraform, Kafka, CI/CD
Databases: PostgreSQL, MySQL, MariaDB, MongoDB, SQLite

Certifications

Algorithms Specialization (Stanford), Machine Learning (DeepLearning.AI), Meta Backend/Frontend Developer

Education

Politecnico di Torino	Sep 2025 – Present
<i>M.Sc. in Computer Engineering</i>	<i>Turin, Italy</i>
Politecnico di Torino	Sep 2021 – Sep 2025
<i>B.Sc. in Computer Engineering</i>	<i>Turin, Italy</i>

Languages

English (Bilingual), Persian (Bilingual), German (Professional), Italian (Fluent), French (Fluent)
